5. Features and Benefits

Daemco Australia have reviewed the Fitzroy and stop boxes which are in GWW approval list and designed their products with a number of additional improvements.

- a) Lightweight structure that can be easily handled and installed.
- b) High load rating for long service life. These products are classified as Classes A or B
- c) UV stabilised for product integrity and to prevent colour fading for Lilac colour.
- d) Non-slip surface that can be easily cleaned when required.
- e) Products are supplied fully assembled.
- f) Hold significant stock along with its appointed distributor(s) in Melbourne to ensure constant availability for project works.
- g) All lid components are interchangeable with other products currently being sold in the market.
